

# How do i feel when my bucket is full

When my bucket is full, i feel more confident, secure, calm, patient, and friendly. My thoughts are positive and i expect positive results. When my bucket is overflowing, i experience an intense happiness that can spread to those around me. Have you ever felt better after someone gave you a friendly smile or happy grin? This is the "ripple effect" of a full bucket.

I like when my bucket is full it makes me a happier person and my world a better place to be. I like when my family has a full bucket it makes my family home a better place to live in. I like when my school has a full bucket it makes my school happier and very nice and a happy place to be. I like when my friend's bucket's are full it makes them happier people to be with.

Each of us has an invisible bucket. It is constantly emptied or filled depending on what others say or do to us. When our bucket is full, we feel great. When it's empty we feel awful.

When we read the bucket book's it makes me feel happy, nice and friendly to every one at school and everywhere and the tips in the book's, i use them and i make new friends and make my friends happy and my school happy it makes everyone everywhere happy.
